

CORPORATE CAPABILITIES

Value Statement

We are committed to open communication and diversity, equity, and inclusion (DEI) as vital components of responsive and competitive solution-making. Customer service excellence, mutual trust and respect, continuous performance improvement, principled stewardship, and high ethical standards are key to everything that we do.

About Us

For over 40 years, Aegir has successfully provided engineering and technical services by embedding the value of "Customer Satisfaction Excellence." We are an award winning, minority woman-owned small business.

- SBA Prime Contractor of the Year
- SBA 8(a) Graduate of the Year
- Woman Entrepreneur of the Year
- Minority Business Enterprise of the Year

Core Competencies

- Defense Engineering, Logistics, and Technical Services**
 We are experts in missiles, combat, and weapons systems for US Navy, USAF, and Space Force. Aegir's Engineers, Logisticians, and Technicians perform technical analysis, test and evaluation for military avionics, air and surface systems and equipment, and ancillary support equipment. We provide Program and Technical Management, Acquisition Support, Diminishing Manufacturing Sources and Material Shortages (DMSMS) Obsolescence Analysis, Reliability and Maintainability Analysis, Product Life Cycle Support, Safety and Human Factor Analysis, Configuration/Data Management, Training Curriculum development, Facility Operations and Maintenance.
- Corporate Innovation Services**
 Aegir's *Whole System Transformation* approach addresses small- and large-scale Organizational Change Management. Our advanced technology and knowledge management methodologies leverage the Internet of Things (IoT), Artificial Intelligence (AI), and digital transformation to deliver Future-Present Solutions.
- Industrial Cybersecurity Services**
 Aegir's Industrial-Cybersecurity Program provides design, planning, project management, and technical support services for airports, seaports, hospitals, public safety, and defense-related facilities. Our security design and audit services are used by the DOT/FTA, the Los Angeles Police Department, Port of Los Angeles, and County of Ventura General Services Agency.
- Smart Sustainability Services**
 Aegir's *Sustain-ovation* approach links innovation with the transition to a low-carbon economy. With our partners, we deploy rapid, deployable, and portable water treatment, renewable energy, and broadband technology. We serve social entrepreneurs, impact investors, business and industry, and the tech transfer community in localizing the UN Sustainable Development Goals.

Past Performance

- USAF 532nd Training Squadron Technical Services
- NAVFAC Anti-Terrorism Force Protection Technical Services
- NAWC Engineering Support Services
- NAVSEA ERP Strategic Planning Services
- NSWC PHD Acquisition Support Services
